

About Abeo

Abeo was formed in 1997 to provide engineering and systems integration services to the United States Navy. Over time, we have consolidated our position as a technology integrator obsessed with flawless execution and customer satisfaction.

Advanced Consulting Services (ACS)

ACS is the branch of Abeo that works with clients to maximize their technology investment and help them improve business performance.

- Systems integration
- Project management
- Network engineering
- Information security
- Human performance
- Change management
- Process re-engineering
- Cost-benefit analysis

ACS Customers

- IBM – Intrusion detection, scanning, and security assessments
- JPMorgan Chase – Anti-virus software implementation
- META Associates – Network implementation and administration
- Cities of Oceanside & Petaluma, CA – Network installation
- Accenture – Cost-benefit analysis, systems engineering simulation
- Transportation Security Administration – Training technology consulting

Network Engineering

Abeo has deep network engineering capabilities honed at a variety of clients across industries. We can deploy large project teams or individual certified experts to handle your networking needs.

- **Local and wide area networks (LAN/WAN)**
From the high-end enterprise to small office configurations, Abeo designs, installs, and maintains custom IP networks. Network engineers at Abeo are experienced with the latest high speed switches and routers to make your network perform.
- **Virtual private networks (VPN)**
VPNs use advanced encryption to permit organizations to connect securely to your private network over third-party networks, such as the Internet. Whether you need a few workers to access from home or connect an entire remote office location, Abeo can help you find and implement a VPN solution that will meet your communication needs.
- **Servers and workstations installation**
Abeo can provide your organization with servers, racks, and additional equipment for any type of installation. Abeo offers competitive pricing and support agreements are available for any system. Abeo can also provide workstations and desktops for your employees at any level of performance required.
- **Infrastructure moves, additions, and changes**
Making changes at your organization? Abeo can help you avoid down time when moving critical network systems and services.
- **Microsoft Windows networks**
From a simple workgroup to large enterprise domains, Abeo has extensive experience designing, installing, and maintaining Microsoft servers and software.
- **Network design, evaluation, and administration**
Experts at Abeo can design a custom tailored network to meet your business needs. Administration and maintenance of the network is also available for all Abeo-installed networks as well as any existing system. Abeo can perform network optimization and traffic analysis studies to help troubleshoot your network.
- **Firewalls**
Abeo can install, configure, and integrate a complete firewall solution into your organization; includes a firewall requirements evaluation, product selection assistance, full installation and configuration of the firewall product, technical training for your staff, and comprehensive acceptance evaluation.
